

Palace Residence

Prime Real Estate Tokens in Blockchain Technology

Palace Residence allows you to trade virtual lands anywhere in the world without leaving your home.

We focus on large institutional clients. Invest in the projects of verified developers via a smart contract. No intermediaries and minimal commission.

Decentralized P2P-platform for exchange or rent of any assets and services without currency and taxation expenses.

Demand for PRT Tokens is forecasted to be 10X higher than the initial supply.

Why Palace Residence on Blockchain Technology ?

Decentralization

Palace Residence will push the real estate market to become truly peer-to-peer. The transition from a centralized system to a decentralized one must be smooth to mitigate implementation risks. The integrity of the Protocol can allow two parties to make a deal without the intermediation of a third party, or to use a third party when necessary.

Faster Transactions

Palace Residence Protocol will eliminate third-party brokers, lawyers and banks by adding them to the network or assuming their functions such as listings, document flow and payments. Standard registration of the title of deeds with notarized documents could take up to **30 days**. A Palace Residence transaction will take less than **5 minutes**.

Lower Costs

Palace Residence has the potential to greatly reduce transaction fees by eliminating third-party intermediaries and overhead costs for exchanging assets (up to **30%** of property price). The Palace Residence trading fee is **1%** (a reduction of up to 30-fold compared to a traditional real estate transaction), which can be further reduced as the network grows.

Liquidity

Real estate owners get access to both fiat and cryptocurrency investors without traditional cross-country boundaries, which highly speeds up the property sales process. Property-specific token holders can trade them in the secondary market within the Palace Residence platform or wherever they want.

Tokenization

Fractional ownership enables purchasing real estate with a smaller ticket. Property-specific tokens are customized for each property and jurisdiction. Sellers receive a flexible sales instrument, and buyers can choose from a wide variety of real estate opportunities without traditional cross-country boundaries.

Transparency

Ownership and transaction data is accessible to all peers on the network. It is stored in the distributed web and hashes are recorded to the blockchain. The distributed consensus is achieved via a proof-of-stake algorithm; buyers and sellers are empowered with control of their information and have more confidence in conducting transactions.

We focus on B2B sales. Our customers are private equity funds and family offices with multimillion property deals **fueled by PRT tokens globally**

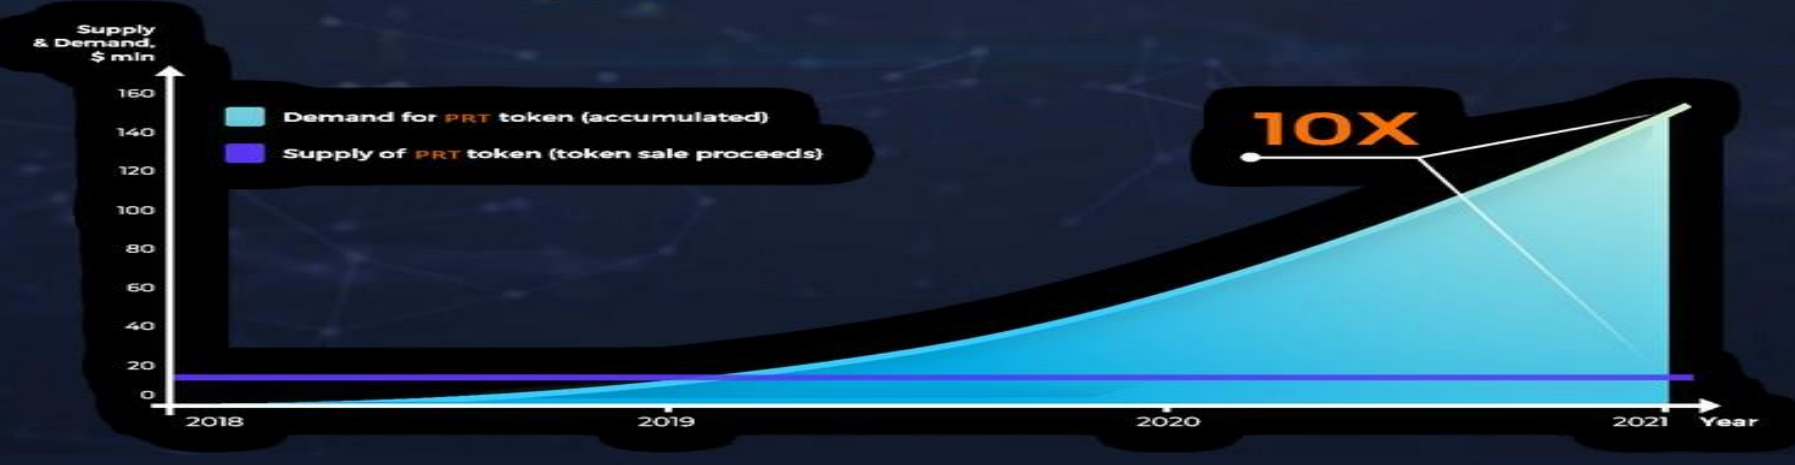

Palace Residence Prototype is Live. Properties in 17 Countries are Already Tokenized.
